RUVEYDA HİLAL AKÇINAR

Management Information System

ABOUT

I'm Ruveyda Hilal Akçınar. I graduated from Düzce University Management Information Systems department as one of the top 5. I am developing myself in the web field and I want to work in a place where I can bring myself to better places in this field. I also love to learn, research and tell what I know. I have developed many projects using Asp.net Core. I've also created several projects using the framework. I share the source codes of these projects on Github.

Besides developing myself in software, I am also interested in communities. First, I became a member of 1907 University Fenerbahçe Association 1907UNİFEB and a community manager. Then I took part in the Google Developer Student Clubs (GDSC Düzce) community for 2 years as a core team. I am currently an Ambassador at Google Women Techmakers and an organizer in the Google Developers Groups community.
